

2017 Round One Applications

Below we've provided demographic information culled from this year's application pool. Geographic distribution and discipline identification are two of many diversities that MAP staff track throughout the review process.

GEOGRAPHIC DISTRIBUTION

In Round One, eligible submissions came from applicants based in forty-one US states and Washington D.C., and Puerto Rico, as well as international submissions from Cambodia, Canada, and Nepal.

A majority (52%) of the 833 eligible applications came from the Northeast Region*, in large part because of the high number (340) of applications from New York state. 24% of eligible applications came from the West Region, while 13% were submitted from the Midwest Region and 11% were submitted from the South Region.

MAP did not receive any eligible applications from Alaska, Arkansas, Delaware, Idaho, Indiana, Mississippi, Montana, North Dakota, or New Hampshire.

*Regional divisions are pulled from the [US Census' geographic regions and divisions](#)

Round One

- Northeast Region: 429 | 52%
 - 38 from New England Division
 - 391 from Middle Atlantic Division
- Midwest Region: 112 | 13%
 - 72 from East North Central Division
 - 40 from West North Central Division
- South Region: 87 | 10%
 - 55 from South Atlantic Division
 - 5 from East South Central Division
 - 27 from West South Central Division
- West Region: 201 | 24%
 - 18 from Mountain Division
 - 183 from Pacific Division
- 4 international | <1%

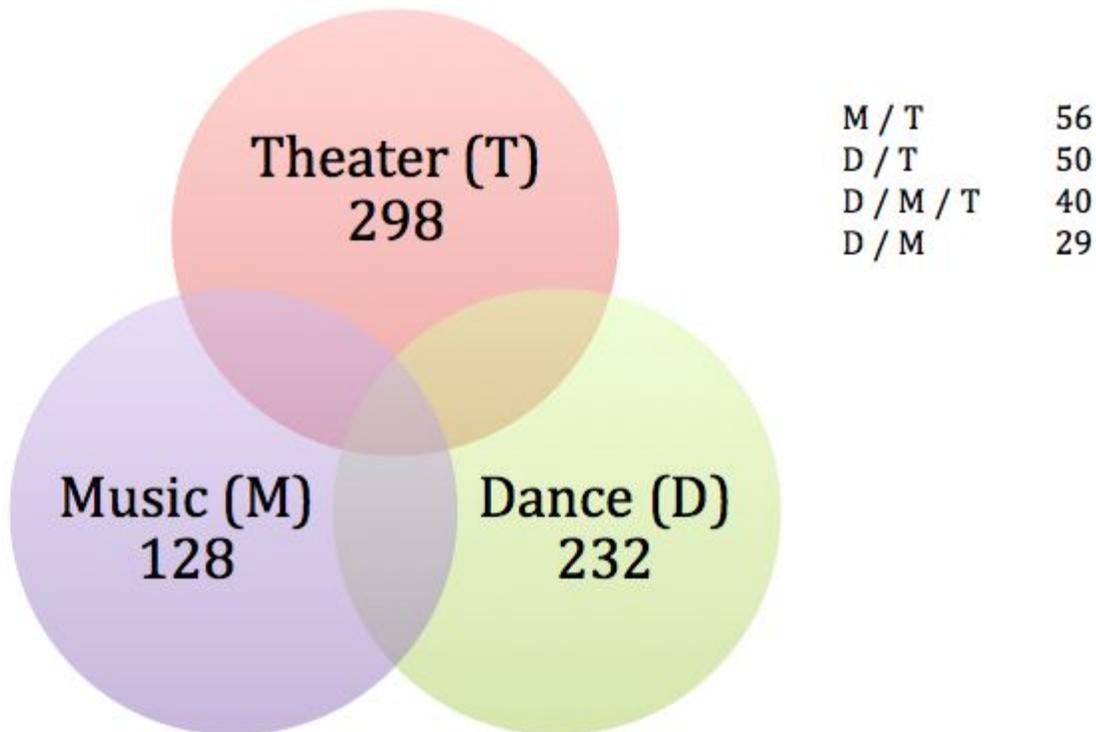

DISCIPLINE IDENTIFICATION

Applicants selected at least one group of live performance specialists who might best understand and speak to their project; the three options were: **Dance / performance specialists, Music / performance specialists, and Theater / performance specialists.**

These category selections are used by MAP staff to pair applications with five reviewers who have relevant experience in these areas.

ROUND ONE: Eligible Projects*

- 658 (79%) selected one discipline
- 135 (16%) selected two disciplines
- 40 (5%) selected three disciplines

* MAP received 911 applications in the 2017 grant cycle. Of those, MAP staff determined that 833 were eligible for further peer review.
